VEGAN COMPASSION GROUP

At the **Vacation Camp Program**, we prioritize Humane Education through vegetable growing, cooking classes, art activities, and games. We also offer engaging, eco-friendly environments and provide **vegan** nutritious meals. Through this program, **we seek to shift perceptions of animals and the environment**, emphasizing the value of partnering with nature over working against it.

Vacation camp

With the crucial support of **Vegan Compassion Group**, we carried out our popular "Vacation Camp" program in the village of El Hato, Guatemala. The children from the primary school, eager to keep learning after finishing their school year, enthusiastically attend the sessions planned and implemented by Adriana, our Literacy Center coordinator. This year, we kicked off the event with a video screening that focused on how to care for and respect animals, followed by an open discussion where the children could express their ideas and share their thoughts. Afterwards, we did a craft activity where the kids made animals out of cardstock, and to wrap things up, we all prepared a vegan snack together, enjoying it amidst laughter and lively conversations.
